SUMMARY

Crypto-native **community operator** for skeptical, technical audiences, in **fintech & Web3 since 2017**. I build from a standing start: a **292k-user channel before product launch**, **161.8k X followers** across a five-brand DeFi ecosystem, and bots, points and leaderboards shipped from scratch. Now building the **trader community at a global multi-asset broker**. I came up in the chats, not behind a brand account: I know what makes users show up, stay, and come back, and I carry what they say **back to Product**. German and English, remote.

EXPERIENCE

Community Engagement Lead, M4Markets - Global Remote Aug 2026 – Present

Building the **trader community** for a global multi-asset CFD broker **from 0** across China, Korea, Japan, India, Vietnam, Thailand, and Southeast Asia, with Marketing, CRM, Data, Compliance, and local teams.

- Built a **Telegram community bot** end-to-end with AI-assisted coding: MT5 account linking, **competition leaderboards**, provably fair lucky draws, referral share cards, and in-chat trading.
- Prepared the bot's **compliance pack** for a regulated broker: 688 member-facing texts, community terms, and a no-advice filter backed by release-blocking automated tests.
- Wrote the **community master strategy** and **rollout plans for seven regions**, grounded in a per-market competitor teardown and client demographic data.
- Designed the **community competition strategy** and proposed the first community-run contest.

Growth & Community Lead, Mimo Capital - Global Remote Sep 2019 – May 2026

Grew from junior community manager to reporting directly to the VP of Growth, owning growth across a multi-brand DeFi, RWA, and non-custodial wallet ecosystem.

- **Closed the loop with Product:** turned user feedback into actionable **Figma specs**, directing developers and designers to ship critical UI/UX improvements for live and pre-launch products. Grew ecosystem reach to **161.8k X followers**, **20k+ Telegram members** at peak, and supported products that reached an **$80M TVL peak**.
- **Led crisis communication** efforts during the TenX-to-Mimo rebrand, holding a brand-new community together under public scrutiny while managing **sentiment, retention and trust**.
- **Managed a distributed team of 6** across all brands, owning every acquisition and community channel: X, Instagram, YouTube, Telegram, Discord, and Reddit. The team included four local Community Managers, a Social Media Manager, and a Designer.

Projects & Brands Managed Under Mimo Capital

Growth & Community, Aya (Pre-Launch)

- Built a **292k-user acquisition channel** from zero before product launch. Scoped the build, hired and managed the developer, and shipped a Telegram mini-game collection that hit 292k users and 15k active players pre-launch.
- Built AyaCommunity as a separate **growth engine** with local communities, managers, and events across India, Indonesia, Vietnam, and the Philippines.

Partnerships, Events & Community ONE OF US .fit

- Built and ran **community, social, and ops** for a global fitness-crypto brand. Drove **7,000+ event participants** in 2025 and maintained a Telegram community of **2,500+ active members**.
- Kept conversations with **partners** and **KOLs** going and managed communication with them for social media and media assets.

Growth, Community & Support, Parallel & Kuma (RWA)

- Scoped and shipped a **Discord raffle and points bot** end-to-end with no existing playbook. Ran over **100 engagement raids** across **multiple brand accounts,** increasing per-post interactions by more than **400%** across both social media accounts.
- **Led growth, community, and support** across Discord, Telegram, governance forums, and social channels for two DeFi protocols.
- Built governance forums and supported proposal management for both **DAO**s.
- Built, grew and moderated communities at scale, including Kuma (**111.3k X followers, 5.3k Discord**) and Parallel (**1.5k Discord, 3,079 Telegram**).

Junior Community Manager, TenX (later rebranded to Mimo) - Remote Feb 2019 - Aug 2019

- Drove the TenX **App Store rating from 3.3 to 4.6 in 2 weeks** through a targeted **power-user campaign**, tying five-star reviews to priority on the debit-card waitlist.
- Managed the international community for a crypto payments and wallet product, with **ownership** of German-speaking users and localization across the app, website, blog, FAQs, Onfido flows, and compliance content.

CORE COMPETENCIES
